

Hakitainer

Hakitainer 1100

Hakitainer 1500

Stacked Hakitainer 1500

Hakitainer - the HAKI storage system

The Hakitainer is designed for the storage, transport and management of HAKI scaffolding or similar materials.

Use the Hakitainer to organize your scaffolding store and make it easier to manage. Robustly designed and easy to stack.

Stacking saves on expensive storage space

and makes storage more efficient.

The Hakitainer ensures that you have a good overview of a well-organized stores and workplace.

Make transport more efficient with the Hakitainer which facilitates both transport by truck and lifting with cranes.

Cut handling costs with the Hakitainer. Shipment between your stores and the worksite is made easier as it is simple to move by truck or crane.

Correctly located on the worksite, Hakitainers can cut manual handling significantly when erecting and dismantling scaffolding.

Hakitainer	1100	1500	Permissible loading	13,8 kN (1380 kp)
Item No	7181110	7181150		
Weight, kg	33,6	39,4	Capacity	70 FSSH 1500 – 3000 standards or 50 LB 1655 – 4050 beams
Principal dimensions			Stacking	Max. five loaded Hakitainers can be stacked on one another. The height when stacking is 638 mm.
Length, cc tube, mm	1100	1500	NOTE:	Not approved as lifting tackle. Goods must be strapped to the Hakitainer when lifted using a crane
Width, cc tube, mm	850	850		
Height, total, mm	665	665	Remark:	The Hakitainer is fully compatible with earlier designs.
Diameter of feet, mm	110	110		
Loading dimensions				
Length, min, mm	1200	1600		
Width, max, mm	800	800		
Height, max when stacking, mm	495	495
